

## About us:

Founded in 2015, Somatix is a behavioral modification B2B2C software platform. We analyze in real-time data received from standard wearables for detecting hand gestures. Then we fuse together additional data sources and search for insights, in order to apply immediate interventions for preventative and rehabilitative healthcare, and wellbeing enhancement.

We aim our efforts towards addictions-control, elderly-care and monitoring of some neurologic diseases. Our customers are corporate employers, health insurance companies and clinics. Somatix provides an enterprise dashboard which allows remote monitoring of the person's compliance and adherence with the cessation plan, in order for the clinician or the coach to obtain higher efficacy of the treatment versus traditional methods of prescription and random periodical assessment.

## The Opportunity:

Somatix is looking for **Backend Engineer**, to be a part of Somatix BMD ("Body Motion Data") a platform that develops various web applications, dashboards and web services.

- This is a key role in a rapidly growing R&D team, and as such you'll have the ability to see the direct impact of your contributions
- HO development of relevant BMD and ML infrastructure
- Ensure our production is in top form
- Contribute to the design, architecture, and development of our products and services
- Produce highly scalable, high quality software in the fast-paced environment of a startup company
- Find innovative solutions to challenging problems

## Requirements:

- BSc in computer science or equivalent or equivalent military background
- Java developer with 3+ years of experience - emphasis on highly scalable environments
- Knowledge in Spring, including Spring-boot and Spring-cloud
- Strong understanding of object-oriented design, data structures, systems and applications
- Experience with SQL and NoSQL (preferable- Mongo DB) databases
- Experience with working with AWS services
- A strong team player with a can-do attitude
- programming and multi-threading programming
- Proficient in Linux/Unix environment
